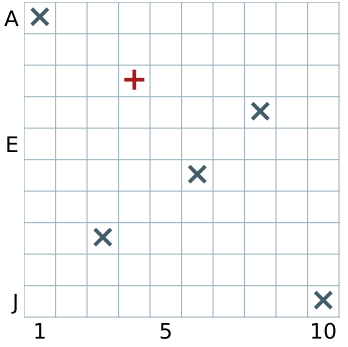
From public observations to an inspectable decision

Generalized Notation Notation → parser → checked finite-state backend

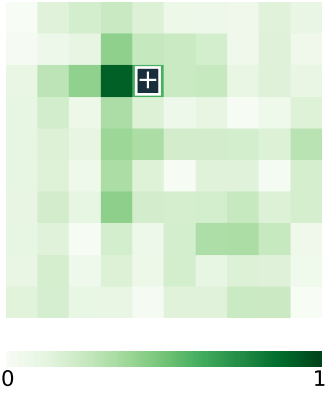
01 OBSERVE



+ hit × miss

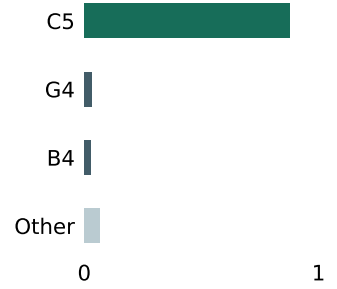
Six observed cells
No selected-fleet access

02 UPDATE



Posterior occupancy
Joint belief over fleet labels

03 SELECT



Action probability [0, 1]

C5: 60.5% hit forecast
0.573 nats information

Select one unvisited cell, observe its outcome, and update

256 catalog labels · 94 legal actions · one-shot planning · no parameter learning
